Ahhh, Summer! The "in-between" season where resident parent birds are well into raising their young and almost finished, some young are "teenagers" all ready with many of the adults being very patient even though a little worn out, as seen in their plumage, with parenting duties. Depending on the "Three Requirements for Successful Breeding," food, water, and shelter, these residents could be pretty much done with breeding for this year with the young being clumsy while trying to be "all grown up"; migrants have gone to their own far-away breeding grounds; the weather is not bringing us any vagrants to puzzle and entertain us. It is an interesting season because this is the opportunity for you to become intimately familiar with resident bird family life! Take advantage of it!!!!
